# Digital Signage Key Features

| Features | Description |
|---|---|
| Touch-screen with response speed of 4ms | We offer one of the fastest touch screens on the market today with the enhanced sensitivity of the infrared touch screen making it easier to operate. |
| Sleek, Slim & 178 º Viewing Angle | Wide viewing angles of 178 º , a high-resolution LED screen, ensures a good view from every angle |
| Auto adjusted brightness | Displays adjust their brightness levels as ambient light changes so the images are clear and this feature helps to save energy |
| Built-in fan control | Housed inside, the fan prevents Multiboard from overheating and prolongs its life. The fan can be controlled with an on-screen display. |
| Durability | Prestigio DS Multiboard has specially-designed protection glass, which is scratch resistant and shatter-proof, that shields the panel's surface from any damage. The lifespan of the LED panel is approximately 80 000 hours (or over 10years when used 24/7 ) |

# Stands

Prestigio MultiBoard provides you with every type of connection you might need including a full range of accessories for indoor / outdoor use
